Non- Working Slots **Income**

Non-Working Slots Income

40%

- Your upline gets income from A, B & F.
- You get income from C, D & E.
- Slots re-opens with F (re-entry).
- Income comes from Upline, Downline & Cross lines .

This income comes from upline, downline & cross lines

Explanation of Non-Working Slots.

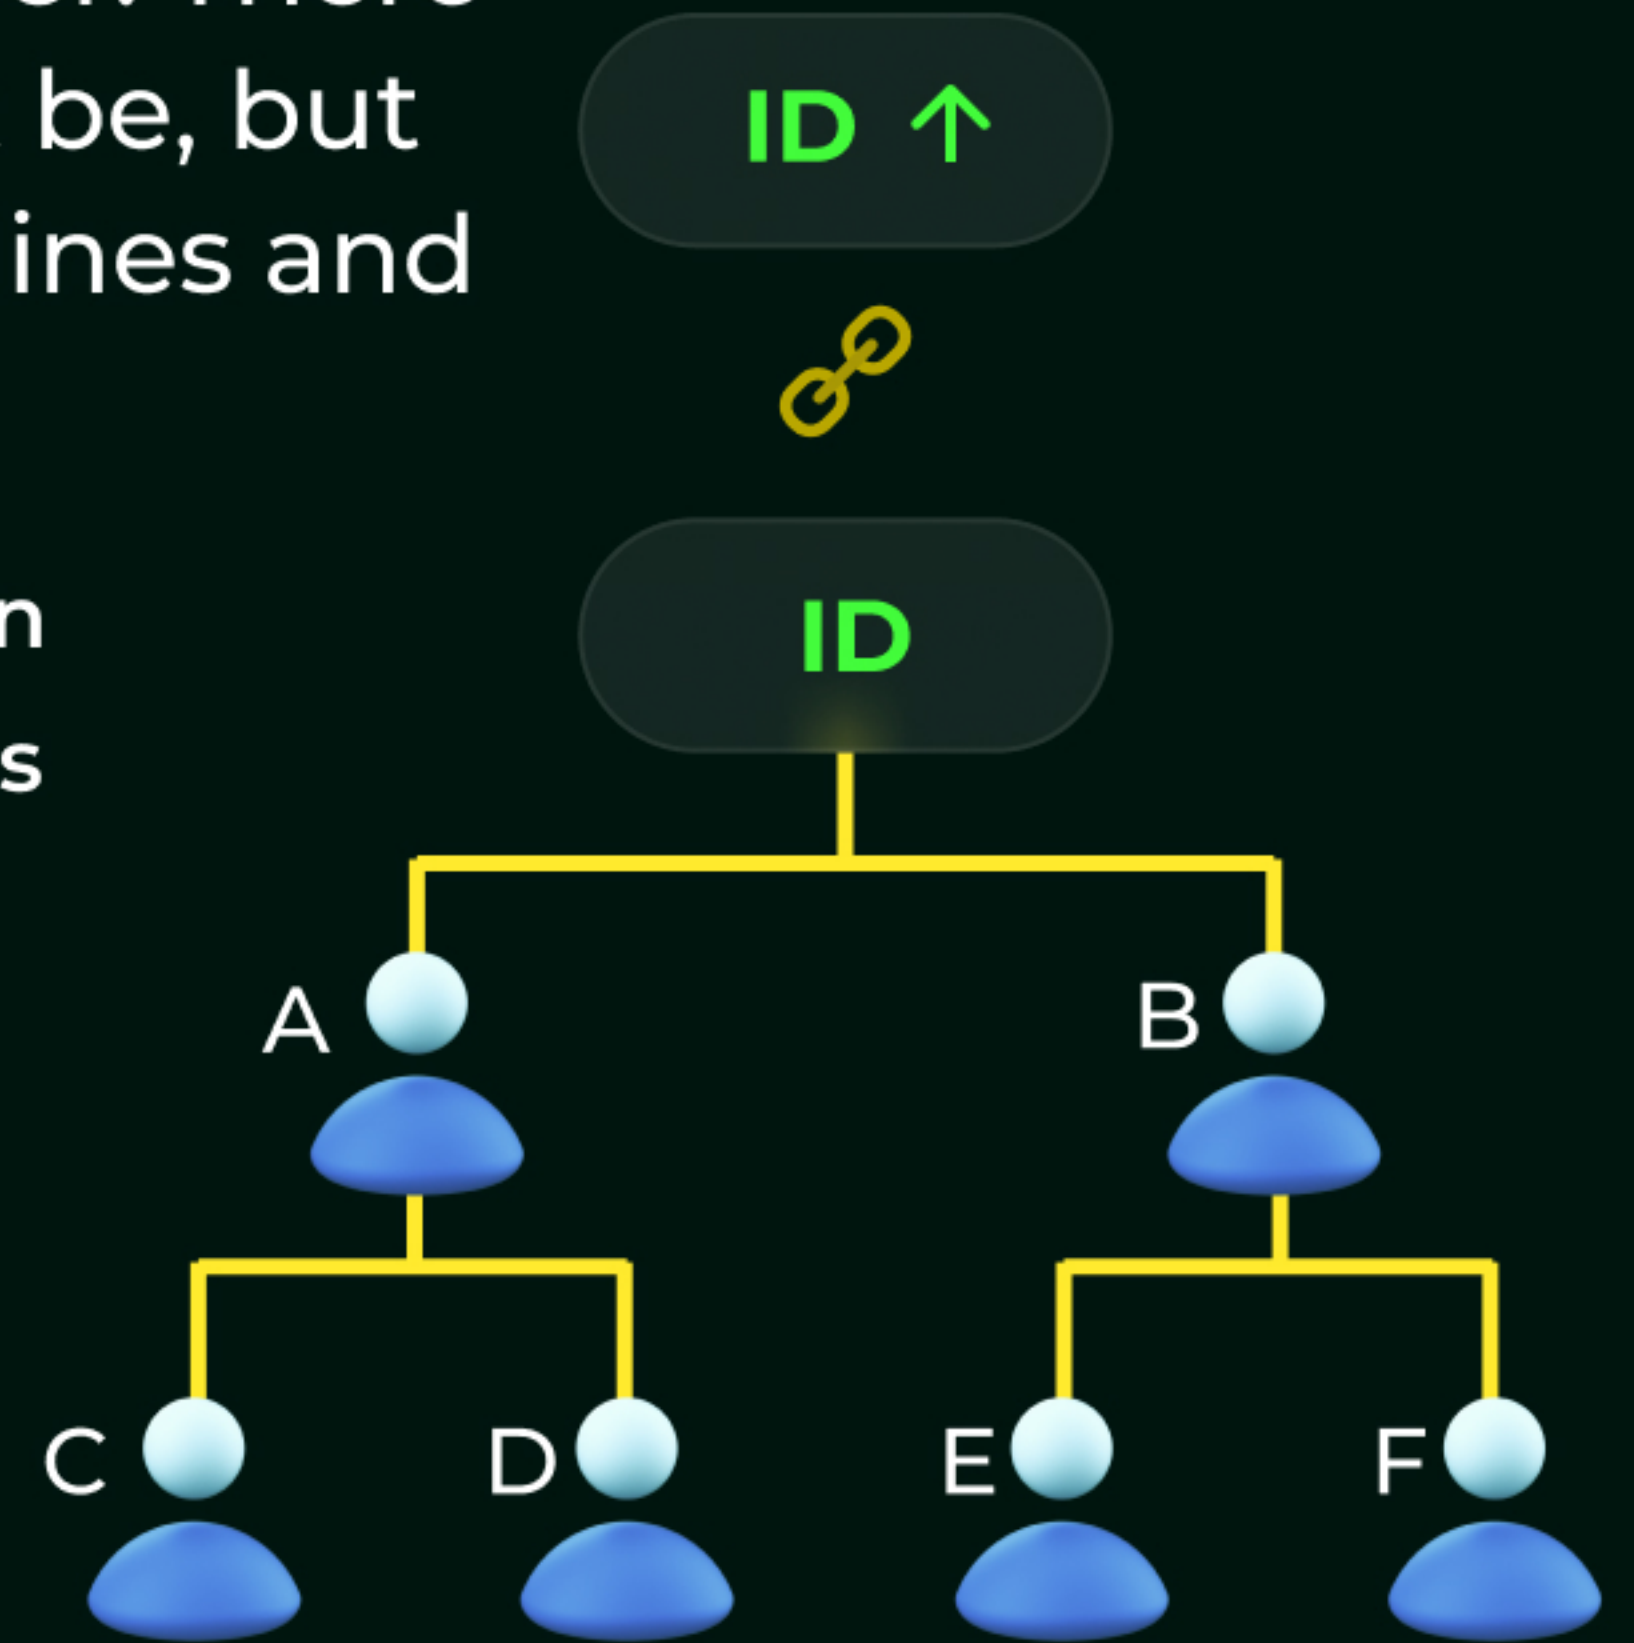

The Non-Working Slots Income has an overflow system, from both top and bottom that assembles the team together. There may be people invited by you in the system or may not be, but you are bound to get support from your uplines, downlines and even cross lines.

A & B partners who occupy 2 places below you in the first line, are in the second line with a superior partner. Payment of both A & B goes **100%** to his wallet.

C, D & E - By using the same logic, you receive income not from the first but from the second line, **100%** from each four people out of which 3 payments. i.e. from C, D & E directly goes to your wallet.

F - This last payout closes the site and makes re-invest buying you the same site again and **100%** of this payment goes to your superior partner.

Conditions

- Minimum withdrawal is 20 USDT.
- 2 direct necessary for entry in global autopools and withdrawals.
- 10% deduction in withdrawals.
- 10% deductions in withdrawals are distributed through team level income so QuickFX is based on a 100% distribution model.
- To get income from the team through slots upgradations from non working slots, one should have his/her slots upgraded before the team.

MetaTrader 5 (MT 5)

Algorithmic Trading

MetaTrader 5 Trading Platform is the choice for millions of forex and stock traders. MetaTrader 5 uses algorithmic trading to let trading robots analyze the market and trade for you. One of the most fascinating possibilities provided by MetaTrader 5 is the algorithmic trading feature, which enables automated trading using robots. These applications can analyze the market and perform trading operations in accordance with a specific trading strategy.

The MetaTrader 5 platform provides a specialized MQL5 development environment for algorithmic trading. MQL5 IDE enables traders and programmers with any skill level to develop, debug, test, and optimize trading robots.

Thus, all you need to do is to bind QuickFX with Meta 5 and see the magic happen. Goes without saying, your funds are safe in your own MetaTrader 5 account, and QuickFX does not have access to your funds but only to apply its trading techniques to your MetaTrader 5 account in order to grow your funds with its strategies.
